## Profile

Systems Engineering student at the University of Cartagena, with capacity to perform at an interdisciplinary level in the technical and social field. I consider myself a responsible, dynamic person, with aspirations, desires to improve and goals based on the achievement of objectives. I have the ability to work as a team or individually, using excellent interpersonal relationships, with an attitude of easy adaptation and a desire to learn.

I learn quickly, and I am interested in properly complying with punctuality, honesty and responsibility in the different activities that I carry out. On a professional level I am passionate about application development, making use of programming languages such as Java, JavaScript. Frontend knowledge in Reactjs and ReactNative, for web and mobile development respectively, and database management implementing SQL.
